

AW-SFU60

Software key to activate the SMPTE ST 2110 support options for the AW-UE160W/K. By activating the software key, the AW-UE160W/K can be used as the industry's first* PTZ camera that supports SMPTE ST 2110, enabling the construction of an IP-based studio system centered on KAIROS, relay system that can transmit high-quality, high-capacity video with low latency, and remote production system, thereby promoting greater efficiency in video production sites. * As of February 2023. According to Panasonic's research
