Freeware to support efficient setup and operation of PTZ Cameras

EasyIP Setup Tool Plus

EasyIP Setup Tool Plus is a piece of freeware that enables the centralized management of a range of network settings and firmware updates for PTZ Cameras. It supports efficient camera setup and operation in a range of situations where multiple cameras are used, including during installation work and setup for events.

Key Features

Panasonic PTZ Cameras connected to a PC are detected and centralized display and management of camera information such as IP addresses and version numbers can be performed.

The network setting information of specific PTZ Cameras can be modified from the GUI screen.

PTZ Cameras can be selected and controlled from a browser GUI.

Auto IP: Multiple PTZ Cameras can be selected and assigned consecutive IP addresses.

Firmware Update: PTZ Camera firmware updates can be performed automatically through the tool. *1

Identify: The power indictor light of specific PTZ Cameras can be turned on rapidly. *2

Administrator Registration: PTZ Cameras can be selected and batch registration of administrator accounts can be performed. *3
